

Keep Australia Beautiful National Awards

November 2013

Launceston was named the winner of the Community Action & Partnerships category, recognising the outstanding way in which council & community work in harmony when addressing the many facets of community life.

Launceston also received a Highly Commended award certificate for the excellent manner in which it is dealing with the Energy Innovation category.

Congratulations to all those who have contributed to Launceston's being so successful in these areas.

Tammy Edmunds represented the Launceston community. Her presentation to the gathering of some 90-100 people from around Australia on the excellent way in which Launceston is addressing matters associated with sustainability was first class with a delightful blend of seriousness and humour. Her address was warmly received by all.

Godfrey's Beach was Tasmania's entrant in the National Clean Beaches award. The photo below records the commendation certificate which Peter Brown and Sue Smedley received from KAB's national chair Robert Thomas on behalf of Stanley & Circular Head Council. It was congratulating them for their outstanding performance in the category Community Partnership & Action.
